

AUTOMATED CRYPTO-TRADING

DECENTRALISED APPLICATION ON THE ETHEREUM BLOCKCHAIN

THE PROBLEM

Trading crypto's is 24/7, high risk and highly volatile.

Rapid growing and complex market.

No single exchange has all markets.

Human emotions are main cause of bad trades.

Automated trading requires a unique skill set.

Centralised systems are restricted and expensive.

GIMMER SOLVES THIS

Global community-based automated cryptocurrency trading platform where users share, learn and earn together.

It's easy-to-use and accessible to all types of customer.

BOT STORE

A global trading bot marketplace where experienced users can rent out their own trading bot strategies to other users of the platform at a fee (in GMR) that they decide.

DECENTRALISED APPLICATION

Faster - no restrictions with exchange REST APIs.

Cheaper - no central server running costs.

Secure - users are in control over their personal data.

Transparent - bot performance stored on the blockchain.

GMR token - single payment solution for a global audience.

Gimmer is perfect for anyone who wants to trade in cryptocurrencies and lacks either the time to monitor the markets, the necessary programming skills or the required trading knowledge.
